

**Results of Petition Against Siting a Telus Telecommunication Tower at  
4537 Rocky Point Road**

*September 30, 2010*

*Summary:* 100% of adults living on properties within 100 meters of the base of the Telus telecommunication tower proposed for 4537 Rocky Point Road have signed a petition asking Telus to relocate the proposed tower. A survey of the majority of persons living within 500 meters of the proposed tower indicates that 90% are opposed to a tower on the site

*Background:* Several of us who reside in the vicinity of 4537 Rocky Point Road have spent the last two weeks assessing neighbourhood attitudes toward the construction of the proposed Telus tower at that site. We have been circulating a petition (Appendix A) that requests Telus to relocate the tower. Our efforts have been made in response to consultation process initiated by Telus at the beginning of September. As a part of this consultation process, Telus circulated an eight-page proposal to build the tower and asked residents to respond. Telus says in its proposal that the company is operating under what is called the "Default Public Consultation Process" described in Industry Canada's CPC-2-0-03 (Client Procedures Circular).

The CPC document outlines what we consider a very minimal consultation process. It only requires Telus to contact, for example, people whose property lies within three times the tower height, a circle whose radius is 100 meters. Even so, our impression is that Telus's goal in the consultation process has been to leave as many people unconsulted as possible and to discourage dialog with those it does consult. We cite in this regard the following seven actions by Telus:

- (1) A circle with a radius of 100 meters may embrace dozens, even hundreds of people in an urban area. In a rural area such a circle encloses few residences. The range of people affected by a roadside tower in rural area, however, particularly an area with open sight lines and limited roads, is a much wider clientele. Telus should have taken this distinct rural clientele into account in adapting the Industry Canada procedures to the Metchosin environment. By our reckoning, residential properties of only *nine* families lie within the 100 meter radius. In reality, ten times this number of families will be directly impacted by the construction of a tower at 4537 Rocky Point Road.
- (2) In contacting the minimum of families within the 100-meter notification range, Telus displayed a callous carelessness in drawing the affected families into the consultation process. Because of an error made by Telus in reading a plat map, one of the nine families received no notification. A second residence in the circle belongs to a couple who are in the Canadian Navy, both of whom are in military exercises in the Pacific and will not return until the end of October. A third property has two houses; the resident who does not pick up mail at the property address received no notice. Kem Luther contacted Darren Hird of Telus about the first two of these situations. He was told by Mr. Hird that Telus had no further responsibility to notify these families. A few days later Mr. Luther contacted Mr. Hird by email and asked him to mail an additional ten copies of the proposal so that he could give them to the families who did not receive the notice. Mr. Hird sent the proposal as an email attachment and said that Mr. Luther could print them out--at his own expense, we note. (The three families have now been

contacted, no thanks to Telus, which seems to have done its best to exclude one-third of the families in an already-constricted notification range).

- (3) Telus was required to give residents “30 days or more” to respond. In the proposal, which contained an in-house date of September 1, residents were told to submit responses by September 30, a period of only 29 days. Kem Luther contacted Mr. Hird and asked him to extend the submission date. Mr. Hird said that Telus would probably accept submissions that came in late, but he refused, when requested, to provide these assurances to residents in writing. In addition, residents who received the proposal, which was sent via Canada Post, did not receive them until after Labour Day. The officially notified residents have had, in effect, little more than three weeks to assimilate the proposal, learn what they could about telecommunication towers, spread the news to neighbours who did not receive the proposal, meet and organize neighbourhood opinion, and write responses to Telus, doing all of this, moreover, in what bits of spare time they could clip from their already full schedules.
- (4) According to the Industry Canada guidelines, Telus would have been required to put a notice in a local paper if the tower were “30 meters or higher.” We note that the proposed tower is 29.9 meters high—a number that seems deliberately chosen to minimize public consultation requirements. In our opinion, Telus should not have followed the Industry Canada guidelines so narrowly, especially in view of the fact that the guidelines allow them to add an extra 25 feet to the tower without consulting anyone. As we noted above, Telus shaved 3% from the response time. If Telus believes that missing a target by 3% is trivial, then it should also have felt some obligation to treat as a 30 meter tower a structure whose height is a mere 1% less than 30 meters. What’s sauce for the goose is sauce for the gander. Telus, we believe, should have put an announcement in local papers.
- (5) The guidelines say that “in areas of seasonal residence, the proponent [i.e., Telus], in consultation with the land-use authority, is responsible for determining the best manner to notify such residents to ensure their engagement.” The local land-use authority, the District of Metchosin, was not consulted by Telus about whether seasonal residences were included in the 100-meter radius circle.
- (6) The guidelines do not provide for mandatory public meetings. When Mr. Hird was contacted and asked if they would consider some kind of public forum, his response was that Telus does not normally hold such meetings in conjunction with a tower proposal. Not having a public meeting in a rural area such as Metchosin means that many people who might otherwise have an opinion about the tower (whether pro or con) are effectively excluded from the consultation. Metchosinites are active supporters of local government and quite accustomed to (sometimes contentious) discussions of issues that affect our unique rural life. In this area a public consultation without a well-organized public meeting is not a real consultation. We note that at the Council Meeting on September 27 Metchosin Councillor Gramigna issued a public call for Telus to make arrangements to attend a public meeting to discuss its proposal. Telus failed, in short, to do enough background research to learn what kind of community it was consulting.
- (7) By far the most blatant transgression of the spirit of public consultation has been Telus’s refusal to deal with the local land-use authority, the District of Metchosin (DM), in the process of finding a site for a Metchosin tower. Telus was in discussions with the DM in the spring of this year about possible sites. Metchosin began work, with Telus’s knowledge, on an antenna siting protocol. Telus made a deal with the Juan de Fuca Columbus Club, without DM knowledge, to lease their land--the DM only learned about the proposal when the residents did. The DM quickly passed the

antenna siting protocol it had been working on. It is now the Communications Antenna Location and Consultation Policy by-law. Kem Luther contacted Darren Hird and told him about the actions of the DM and the by-law. Mr Hird indicated that Telus was not required to respect this new policy or the broader consultation policy outlined contained within it. On Sept 13, 2010, the DM CAO sent a letter to Telus with the new policy attached and announced (1) that it did not believe Telus had provided the DM with official notice that a consultation period had begun and (2) that it expected Telus to apply for siting of a tower within the parameters laid out in the new policy. As of this writing Telus has not responded. Clearly, a consultation process that excludes an actively engaged local land-use authority that is willing to draw up by-laws and to participate in discussions is not the intention of Industry Canada's circular, which mentions "land-use authority" more than 50 times and encourages applicants for towers to work closely with the local governments.

Taken as a group, these seven actions by Telus paint a picture of a company manipulating federal guidelines in a way that provides the least possible input from the people affected by the proposal. Telus's actions violate both the letter and the spirit of the Industry Canada guidelines that they claim to be following. Telus, we believe, is pursuing a consultation process that does not consult.

*Results:* Since Telus did not exercise due diligence in notifying and dialoguing with Metchosin residents, a group of us decided to take on part of the task. We began by drawing two circles on a Metchosin plat map (see Appendix B). One circle had a radius of 100 meters from the proposed tower. The second had a radius of 500 meters. We then drew up a petition asking Telus to relocate the tower and we circulated it (1) to everyone in the smaller circle and (2) to as many people as we could contact in the larger circle. We started with the smaller circle because that was the area of notification specified by the consultation protocol Telus claimed to be using. The larger circle represents the notification radius of Metchosin's antenna siting protocol. A copy of the signed petitions is attached to this document as Appendix D.

Inside the smaller circle nine families have legal residences. All adult members of each of the families, 21 persons in all, signed the petition. In short, 100% of the officially notified (or at least *supposed* to be officially notified) families have responded to the consultation with a resounding "No" to siting a tower at 4537 Rocky Point Road.

Inside the larger area we find 68 addresses that have primary residences with people currently living in them. In Appendix C we have listed these residences. At the time of this writing, just over 80% percent of these residences (54 of them) have been contacted by one of us and the residents told about, or given copies of, the Telus tower proposal. At least one person from 90% of the contacted residences (88 people in all) signed the petition to relocate the tower. Of the remainder, 8% (4 residences) indicated that they did not want the information about the proposal and 2% (i.e., 1 residence) said it was in favour of the tower siting.

In addition to those living inside the two circles, we also received signatures on the petition from other Metchosin residents. So far we have 297 signatures from people living inside and outside the 500 meter radius. The original copies of the petitions will be deposited with the District of Metchosin in the next few days and can be viewed there.

The petitions contained a column for short comments. Most residents added a comment. Here is a sampling of the comments on the petitions:

*Unsightly*  
*Better site*  
*NO. Keep your emissions to yourself*  
*Find a better site*  
*Not in a populated area*  
*Put it where people don't live*  
*Eyesore and health concern*  
*I would be forced TO MOVE!*  
*Wrong site for Metchosin*  
*Health implications*  
*More research needed*  
*Wrong site*  
*Build the tower somewhere else*  
*Not here*  
*Ugly*  
*Health and bees*  
*We don't need it, when and if we do in the future more information concerning health risks will be available.*  
*Use of the precautionary principle suggests erring on the side of caution*  
*Rural ambience is precious—Keep it!*  
*Find a site out of sight*  
*Health and visual concerns*  
*Work with municipality on location*  
*For Telus to work with Council*  
*Proper consultation with Council and citizens*  
*Alternate location*  
*Proper consultation regarding much more suitable location*  
*Hazardous to my health—put in unpopulated area*  
*Shameful!*  
*Need proper consultation*  
*Inappropriate in residential location*  
*No towers in my backyard, please*  
*No tower on ALR lands*  
*Find somewhere with lower density*  
*Please stop this now!*  
*More research needed to understand negative effects of cell*  
*Jury's out on bees*  
*Ugly placement*  
*Need placement away from homes, behind trees*  
*Too close to people*  
*More remote, higher up*  
*Too close to homes*  
*More information, alternate location*  
*Relocate in a more remote area*  
*Absolutely No*  
*No eyesores on main road*  
*Surely there is an alternate site.*

*Conclusion:* The people of Metchosin who are most closely affected by the proposed tower at 4537 Rocky Point Road have spoken in a decisive way: the currently proposed location is not the right place to site a telecommunication antenna.

Respectfully submitted,

Larry Johnson    Derrick Hamilton  
Kem Luther      Philip Wadham  
Sally Garcelon

## Appendix A: Petition Wording

### 9/15/ 2010. **Petition to Stop Telus from building a Communications Tower on Rocky Point Rd.**

<b>Petition summary and background</b>	TELUS is proposing a 29.9 m monopole. All of the equipment necessary to operate this facility will reside within a shelter located at the base of the tower. The tower will be located on a portion of the lot at 4537 Rocky Point Road, The exact coordinates of the location are: Latitude 48°22'41.9N, Longitude 1 23°32'27.42'W, as per Telus file (BC0544).
<b>Action petitioned for</b>	We, the undersigned, are concerned citizens who urge you to act now. This tower is completely inconsistent with the rural nature of Metchosin and would create a hardship on the surrounding community. In this instance or any other similar situation, a non-residential area should be the only allowable placement for any cell tower. We do realize that towers cannot be totally banned, however all alternative scenarios must be exhausted to make an appropriate siting. In this case "Telus" failed to exercise their due diligence in regards to the health and rights of surrounding residents, and therefore the project should be relocated to an area where there is no potential for harm to surrounding residents and their property. We thank you for your consideration of the aforementioned.

**9/15/2010. Petition to Stop Telus from building a Communications Tower on Rocky Point Rd.**

<b>Petition summary and background</b>	TELUS is proposing a 29.9 m monopole. All of the equipment necessary to operate this facility will reside within a shelter located at the base of the tower. The tower will be located on a portion of the lot at 4537 Rocky Point Road. The exact coordinates of the location are: Latitude 48°22'41.9N, Longitude 123°32'27.42W, as per Telus file (BC0544).
<b>Action petitioned for</b>	We, the undersigned, are concerned citizens who urge you to act now. This tower is completely inconsistent with the rural nature of Metchoan and would create a hardship on the surrounding community. In this instance or any other similar situation, a non-residential area should be the only allowable placement for any cell tower. We do realize that towers cannot be totally banned, however all alternative scenarios must be exhausted to make an appropriate siting. In this case "Telus" failed to exercise their due diligence in regards to the health and rights of surrounding residents, and therefore the project should be relocated to an area where there is no potential for harm to surrounding residents and their property. We thank you for your consideration of the aforementioned.

We do realize that towers cannot be totally banned, however all alternative scenarios must be exhausted to make an appropriate siting. In this case "Telus" failed to exercise their due diligence in regards to the health and rights of surrounding residents, and therefore the project should be relocated to an area where there is no potential for harm to surrounding residents and their property. We thank you for your consideration of the aforementioned.

**9/15/2010. Petition to Stop Telus from building a Communications Tower on Rocky Point Rd.**

<b>Petition summary and background</b>	TELUS is proposing a 29.9 m monopole. All of the equipment necessary to operate this facility will reside within a shelter located at the base of the tower. The tower will be located on a portion of the lot at 4537 Rocky Point Road. The exact coordinates of the location are: Latitude 48°22'41.9N, Longitude 1 23°32'27.42"W, as per Telus file (BC0544).
<b>Action petitioned for</b>	We, the undersigned, are concerned citizens who urge you to act now. This tower is completely inconsistent with the rural nature of Metchosin and would create a hardship on the surrounding community. In this instance or any other similar situation, a non-residential area should be the only allowable placement for any cell tower. We do realize that towers cannot be totally banned, however all alternative scenarios must be exhausted to make an appropriate siting. In this case "Telus" failed to exercise their due diligence in regards to the health and rights of surrounding residents, and therefore the project should be relocated to an area where there is no potential for harm to surrounding residents and their property. We thank you for your consideration of the aforementioned.
